**With a single point of contact, leveraging on the vast experience across our organization, you as a customer can feel safe and focus on your core business**

# Case 1: USA

## Automotive industry

- Emergency Response Team (ERT) officers are certified as structural firefighters, constitute the in-plant fire department and operate the plant fire station
- ERT officers are certified as First Responders for medical emergencies
- These officers check crews preparing to work within confined spaces
- They issue cutting and welding ("hot work") permits and provide training
- They normally respond to over a thousand safety emergencies each year at this site

## Case 2: Germany Chemical and pharmaceutical industry

- Employees with special qualifications who are compensated at or above local industry standard wages. Employee turnover is less than 1% a year
- Investment in security engineering that continuously improves the performance of Securitas personnel
- The chemical and pharmaceutical industry has a very clearly defined structure. Securitas directly manages the on-site security, safety and service processes

### Services provided:

- Security management
- Emergency management
- Plant protection
- Technical assistance
- Control centers, fire departments and alarm centers
- Specialized gas and fire guards
- Design of plant security organizations
- Training
- Investment in operator models

## Case 3: France Cultural industry – an Opera House

- Constant presence of fire safety and personal protection services qualified guards
- Different tasks from supporting the fire safety team leader to developing the safety mechanisms during meeting of the safety committee
- All guards are trained for emergency intervention
- The work of the security team is adapted to the daily operations
- During performances, the Opera House is under the control of the security team

## Case 4: Sweden High-tech and defence industry

- Integrated full range of technology in combined solutions
- Specialists in technology, fire prevention and risk management
- Fire prevention services with guards and fire brigades
- Implementation of customer web portal and quarterly report
- Outsourcing of administration and reception services.
- Integrated solutions for remote control of overseas offices
- Pinkerton and Secredo (Corporate Risk Management) used in high end missions

**As part of the complete security services delivery system, we support the customer with an integrated fire prevention solution**

# Global knowledge, local execution with Securitas

- Securitas is available for a non-binding consultation of your facility
- The process begins by determining your specific needs through an operational analysis, site visits and interviews
- Based on our findings, we recommend a solution
- We are with you every step along the way
